

Distribution Transformer Fuses

Fusibles para Transformadores de Distribución

The product is used in indoor system of 50HZ and rated voltage of 10-15.5kV.

It cannot be used independently, instead it must be connected in series together with oil-immersed transformer protection backup fuse to offer an overall protection against indoor electric system. The products are tested by national high-voltage electric facilities Quality Supervising and Testing center, and they are in accordance with GB15166.2 and IEC282-2.

■ 电气性能 Ratings Overview

| 描述 Description | 参数 Parameters |
|------------------------------------|---------------|
| 雷电冲击电压 Impulse withstand voltage | 150kV |
| 1分钟工频耐压 AC withstand voltage, 1min | 50kV |

| 电压等级 Voltage | 单相开断最大电流 顶部安装/侧面安装 Maximum Single-Phase Interrupting Rating | 电压等级 Voltage | 负荷开断 电流 Thermal circuit |
|--------------|--|--------------|----------------------------------|
| 8.3kV | 3000A/3500A | 10.0kV | 160A |
| 15.5kV | 2500A/2500A | 15.5kV | 150A |
| 23kV | 1000A/1000A | 26.7kV | 80A |
